Pursuant to the directives of paper No. 9 (filed 3/11/02), claims 18 and 31 have been amended. Claims 18-34 remain pending.

Applicants' election of Group I is acknowledged, as is the elected specie (2"-methylpyrido[2,3-5 γ , 5 δ]prisinamcyin I_E). However, upon reconsideration, the restriction is revised. (The numbering of groups begins with "IV", to avoid overlap).

*

Restriction to one of the following inventions is required under 35 U.S.C. §121:

IV. Claims 18-30, 32-34 drawn to compounds, methods of making compounds, and a binary mixture of compounds.

V. Claim 31, drawn to synthetic intermediates.

The claimed inventions are distinct.

Group V compounds are known in the prior art, especially for the case of R₅ representing a hydrogen atom. See, for example, US Patent 6,352,839.

Thus, the invention of Group V does not "define a contribution" over the art, and consequently "unity of invention" is lacking.

Applicant is advised that for the response to this requirement to be complete, an election of the invention to be examined must be indicated, even if the requirement is traversed (37 C.F.R. 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance

with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

. . . .

In addition to the foregoing, in the event that applicants elect Group V, applicants are required under 35 U.S.C. §121 to elect a disclosed specie for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. A "specie" is a specific compound, with all substituent variables fully accounted for.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a generic claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP 809.02(a).

Should applicant traverse on the ground that the species are not patentable distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. §103 of the other invention.
